

PEOPLE FOR PLANTS

ABOUT US

METS Engineering Group Pty Ltd is an independent specialist consulting group providing services to the global mining industry. METS is Perth based. Our professional staff are available to help on any job in Australia or overseas, whether from the office or on site. The consultancy has developed since 1988 and established itself as a quality service provider. A comprehensive range of services are provided ranging from:

- Mineral Processing
- Engineering Design
- Training
- Specialist Services

A team of professionals with diverse experience in projects, operations and engineering are available to assist clients with the cost effective operation, development and optimisation of treatment processes and plant. METS core business is founded in establishing long-term relationships with its clients enabling us to draw upon our historical knowledge of the specific project operation to derive best possible solution outcomes. We are not just another labour hire company. The METS edge is that our site personnel have behind them access to the technical expertise that has built our reputation as a leader in the field.

- Full access to METS Perth office engineering personnel support including Process, Mechanical, Electrical, and Drafting disciplines
- Full access to METS range of 50+ training courses
- Fully flexible assignment terms
- METS own site safety induction training

METS is aptly skilled to provide personnel to the mining, oil and gas and construction industries:
